PROFILE

B.Tech CSE Student — Aspiring Software Developer — Tech Enthusiast

EDUCATION

B.Tech in Computer Science and Engineering

KIIT University,Bhubaneswar,India

Expected Graduation: 2027

CGPA: 7.00/ 10

TECHNICAL SKILLS

- **Languages:** C, Java, Python
- **Web Development:** HTML, CSS, JavaScript, React
- **Tools:** Git, GitHub, VS Code,Anaconda
- **Core Subjects:** Data Structures, Algorithms, DBMS, Operating Systems
- **Softwares:** Power Point,XL,Word,Adobe Photoshop,Canva

PROJECTS

Flood Prediction System

- Developed a Flood Risk Prediction System,which is a machine learning-based application designed to predict the likelihood of flooding in a specific area using key environmental factors. The system analyzes critical parameters such as monsoon intensity, drainage conditions, climate change impact, and river management to estimate flood risk in real time.
- Used technologies: Machine Learning: Random Forest Classifier Backend: Flask (Python) Frontend: HTML, CSS, JavaScript Libraries: Pandas, NumPy, Scikit-learn, Matplotlib Visualization: Charts and interactive UI
- Achieved: Got O grade by the faculty.

Education During COVID-19

- That was a on spot servey based project which I have done after going a village name Baramunda,India.That was the first on field experience where we talked with the village students,how they have continued their study during COVID-19
- Achived: Got O grade in project report.

ACHIEVEMENTS

- Participated in hackathon named HackCode in University Campus
- Prticipated Art and crafting competition and achieved 2nd position.

CERTIFICATIONS

- Ethical Decision Making for Success in the Tech Industry – Platform (Coursera)
- Corporate Governance - platform(Coursera)
- Bussiness for good: Fundamentals of Corporate Responsibility - platform(Coursera)

EXTRACURRICULAR ACTIVITIES

- Member of coding club,Robotics Club,Art Club in KIIT Activity Center.
- Participated in University events

LANGUAGES

English (Fluent),Bangali(Fluent),Hindi.
